

## IN THE ISSUE:

- «There's plenty of room at the bottom», or how nanotechnologies can change the world of concrete
- Internet-Journal «Nanotechnologies In Construction» – laureate of the «Russian Construction Olympus – 2010» Award
- Foam stabilization by nanosized additives is proposed to use as the means for increasing the quality of non-autoclave foam concretes
- The paper presents the analysis of the patent information about modification of composite materials by introducing functional complex additives and/or nanoadditives
