

IN THE ISSUE:

- Editor-in-Chief's address to the authors and readers of the edition
- Main results of the researches determining the role of nanofillers in fine-aggregate concrete
- On nanotechnologies for obtaining prospective high-quality steels
- Analysis of possible directions for adaptation of grinding-press equipment to industrial nanotechnologies requirements
- On nanotechnologies used in the production of heat insulators of new generation
- On prospective developments presented at the IX Moscow International Saloon of Innovations and Investments;
- Analysis of patent information on the nanoadditives and applied nanotechnologies. Assistance in patent activity

- Review of international events devoted to nanotechnologies
- Nanomaterials and nanotechnologies in research literature
