

IN THE ISSUE:

- Electronic issue «Nanotechnologies in construction: scientific internet journal» is included in the list of the leading scientific journals and editions in which the main results of Ph.D. and doctoral theses are to be published
- On the method of introduction of nanosized particles SiO₂ into cement mixture. The obtained nanosized particles SiO₂ are shown to be considered as perspective modifiers of cement stone and concretes on basis of it
- On the SC «Rosnanotech» activity providing Russia to achieve leading positions in the world markets of nanotechnological production
- Data on the researches of efficiency of porous building materials hydrophobization (cement concretes, lime-sand brick, autoclave foamed concrete) by the new type of soaking composition on basis of nanosized sulfur
