

IN THE ISSUE:

- **T**he results of the industrial research «Development of Russian market of nanotechnological products in construction until 2020». Part 2. ANALYSIS OF THE WORLD MARKET
- **V**arieties of screening architectural coatings based on Portland cement with the addition of powdered nanomaterials shungit were developed. Attenuation and reflection characteristics of electromagnetic radiation received screens were reached. Recommendations for using are presented
- **R**esults of the research in the area of nanomodification of gypsum binder matrix and investigation of the influence of multilayer carbon nanotubes on the structure, physical and mechanical properties of obtained composites
