

INTERNATIONAL CONFERENCE «NANOMATERIALS AND NANOTECHNOLOGIES IN CONSTRUCTION: THEORY, PRACTICE, TECHNICAL REGULATION» (ICNNC-2017)

On the 18–19 of April 2017, National Research Moscow State University of Civil Engineering held the International conference «Nanomaterials And Nanotechnologies In Construction: Theory, Practice, Technical Regulation» (ICNNC-2017)

The organizer of the conference is National Research Moscow State University of Civil Engineering (MSUCE) in cooperation with Russian Academy of Engineering, Regional group of International union of laboratories and experts in construction materials, systems and structures (RILEM), Fund of infrustructural and educational programs of RUSNANO, Russian Union of Construction Engineers.

The participants of the conference delivered interesting presentations. All visitors could take excursion into research departments of the MSUCE.

The information support was provided by the leading specialized mass media, one of them is «Nanotechnologies In Construction: A Scientific Internet-Journal». The edition was awarded with the diploma for information support for the event.
