

SCIENTIFIC ISRAEL – TECHNOLOGICAL ADVANTAGES

Dear Colleagues,

We invite you to submit articles to our peer-reviewed bimonthly journal “Scientific Israel - Technological Advantages” (SITA-Journal). SITA-Journal is a journal with a history. It started as a regular publication in 1999. Israel is a young country changing and developing fast. At present Israel has become one of the recognized science and technology power houses. Subsequent to these revolutionary changes in the status of Israeli science and technology, the Editorial Board of SITA-Journal has concluded that the scope of the journal must be expanded to better reflect the ongoing achievements in various disciplines on the frontline of applied science and technology worldwide.

SITA-Journal encourages the submission of scholarly and applied science articles in a variety of subjects.

The SITA-Journal welcomes papers proposing innovative commercial technologies and feasible mechanisms of their development and commercial implementation with clear potential of valuable practical applications. The fields of our interest include applied physics, e.g., quantum optics, material sciences, nanomaterials in particular, machine engineering, nuclear engineering, mechanical engineering, chemical and biochemical technologies, environmental and ecology protection technologies, etc.

The SITA-Journal prime mission is to reflect current developments and advances in the above fields of applied science and technology. However, SITA-Journal also, intends, from time to time, publishing invited reviews devoted to current breakthroughs in fundamental and applied sciences attracting wide and intense interest of science oriented readers. The selection of the reviews will be made by the Editorial Board advised by internationally recognized experts in the respective fields of science. Subsequent to the reviews publications SITA will be a forum for discussing the new breakthrough concepts in the fundamental and applied sciences. In the section "Letters to the Editor", the SITA-journal offers a platform for free discussion on the status and perspectives of contemporary scientific research.

Recent editions, list of issues, abstracts, and full texts of published articles are posted on the Journal's website: <http://www.sita-journal.com/>.

The Journal is included in the following databases: Web of Science, EBSCOhost Research Databases, Index Copernicus International and eLibrary.ru (RSCI)

Manuscripts may be sent by e-mail to sitapolymate@gmail.com.

With best regards,

Prof. Pavel Kudryavtsev
Editor-in-Chief

Dr. Dmitry Beilin
Managing Editor
