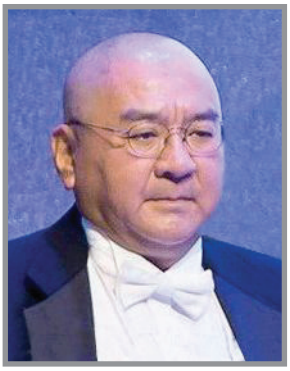
ABOUT THE INTERNATIONAL TANG PRIZE

The international Tang Prize was established in Taiwan in 2012. The Tang Prize is the highest scientific and social award for the outstanding contributions and achievements in the following nominations: «Sustainable development», «Biomedicine», «Sinology», «Jurisprudence» and it keeps the traditions of such events as Olympic movement, Nobel Prize and other international rewards.



The founder of the Tang Prize is Doctor Samuel Yen-Liang Yin

The CEO of the Tang Prize Foundation is Professor Jenn-chuan Chern

In the museum of the Tan Prize

The Tang Prize Medal.

The Tang Prize Medal, designed by Japanese designer Fukasawa Naoto, is a single piece of 214 g., 99,99 pure gold. The spiral curves imply the structure of DNA, a spiral galaxy, an image of a dragon, in addition to speaking of one's life force and expressing a dynamism of movement. Although the spiral curves are based on a circular structure, they never return to the same position. What they express is a sense of infinity that applies to our history, growth, and life.

The Tang Prize Diploma «Door to Outstanding Achivements» was designed by Taiwanese designer Wei-Han Huang. It implies that the Tang Prize holds the prestigious mission of carrying us into the future.

The Prize has been given every two years since 2014. The fund of each nomination is about 1 360 000 USD, and additional grants for further research are about 340 000 USD, the total amount for winner is about 1,7 million USD.
